JUNE 2026

UK Housing Market Report

House prices, rents, mortgage rates, auctions and the wider economy

Dominic Farrell, Distressed Assets
Property investor, author and property mentor

THE VERDICT

More asking price confidence. A mixed sales market.

3.75%

Bank Rate

At the report's data cut off. The last change was the reduction on 18 December 2025.

65,900

Mortgage approvals

For house purchase in April 2026. Seasonally adjusted, net of cancellations.

64.7%

Auction lots sold

UK residential and commercial lots in April 2026; 68.2% a year earlier.

FARRELL'S VIEW

The asking price rise shows sellers still have confidence, while the activity data points to a more complicated market. I would resist treating the national average as a valuation for a particular lot. Work from relevant completed sales, establish a defensible letting figure and check that the finance offer remains valid through completion. There can be opportunity where a motivated seller needs a clean exit, but the margin must cover both execution risk and the cost of time.

Data cut off 9 June 2026. Each figure carries its own observation period, because the sources report on different dates.

02 / MARKET DATA

The market on one page

Eighteen indicators from releases available by the data cut off. The period is shown beside each reading. Changes refer to the comparison described, rather than a single common reporting month.

Auction lots sold, share	**64.7%**	April 2026	68.2% a year earlier

How to read it. UK HPI completed prices lag the market. ONS rents cover new and existing tenancies. BTL means buy to let; LTV means loan to value. Mortgage approvals are seasonally adjusted. Arrears are at least 2.5% of the mortgage balance.

03 / PRICES AND SALES

Different measures. Different stages of a sale.

An asking price is a seller's starting point. Mortgage indices and registered completed sales describe different samples and dates. Read the movement within each series, rather than comparing their price levels.

+1.5% Zoopla

£271,900, April 2026. See source table.

From listing to a financed purchase

Zoopla reports buyer demand 10% below last year but agreed sales 1% higher. First time buyers who remain active are targeting more expensive homes. The national average still conceals different local markets.

STAGE / MEASURE	SOURCE AND PERIOD	READING
New seller asking price	Rightmove, May 2026	£378,304
Mortgage approvals for purchase	BoE, April 2026	65,900
Completed price annual growth	UK HPI, March 2026	+0.0%
Mortgage index annual growth	Nationwide, May 2026	+1.7%

Use completed comparables to set the bid

Match tenure, size, condition and location. An apparent discount to an asking price is not automatically a discount to market value. A lender can also value a property below the agreed price, increasing the cash needed to complete.

04 / REGIONS

How prices and rents vary across the UK

Registered prices across the nine English regions, alongside rent readings for the four UK nations. The geographical coverage and observation periods are labelled separately.

Annual completed price change

March 2026 / UK HPI

ENGLISH REGION	PRICE
East Midlands	£242,000
East of England	£337,000
London	£542,000
North East	£162,000
North West	£215,000
South East	£379,000
South West	£301,000
West Midlands	£246,000
Yorks. and Humber	£208,000

Private rent across the four nations

ONS, April 2026. Northern Ireland is reported two months earlier, to February 2026.

NATION	AVERAGE MONTHLY RENT	ANNUAL CHANGE
England	£1,438	+3.5%
Wales	£834	+4.9%
Scotland	£1,019	+2.0%
Northern Ireland	£877	+4.0%

The ONS advises caution when comparing Scotland and Northern Ireland with other nations because their data collection differs. These are regional and national averages, not valuations or letting appraisals for an individual property.

05 / LETTINGS

Income starts with a realistic rent.

The ONS measures rents across the rental stock. A new contract index measures the latest lettings in its own sample. Neither replaces a local appraisal or the rent payable under the actual tenancy.

RENT MEASURE	SOURCE AND PERIOD	PER MONTH	ON THE YEAR
All tenancies, UK	ONS, April 2026	£1,381	+3.5%
Confirmed new tenancies, England	Goodlord, May 2026	£1,211	+1.7%

Periods and samples differ. The figures are context for a letting decision, rather than interchangeable measures of the same set of properties.

What the latest figures mean for a landlord

Official rental growth has edged higher, but remains modest relative to the increases seen earlier in the cycle. The purchase should be supported by the rent achievable now. The new tenancy framework makes accurate starting assumptions and reliable management especially valuable.

RENTS AGAINST PAY

+3.5%
UK rents

+3.4%
GB regular pay

Different populations and periods. Check local incomes and the affordability of the proposed rent.

THE COST OF A VOID

1 month

An appraisal allowance, not a forecast. One empty month at £1,000 per month removes £1,000 of annual income while fixed costs continue.

Tenancy reform in England

England's first phase of tenancy reform began on 1 May 2026. Ask the managing agent and solicitor to check the tenancy, paperwork and practical possession assumptions before a purchase. Other UK nations have their own systems.

Collected income is what matters: allow for management, maintenance, insurance, compliance, voids and the actual finance terms. Gross yield is only a starting measure.

Sources 1, 9, 14 and 15. Full dated references and method on page 8.

06 / ECONOMY AND BORROWING

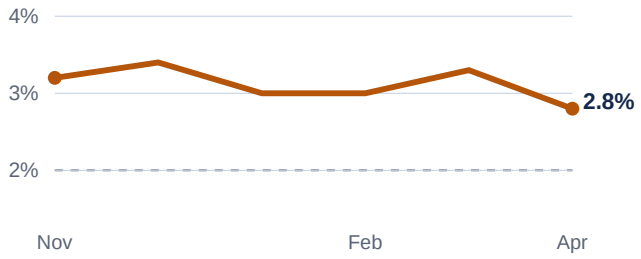

Bank Rate is only part of the borrowing cost.

The latest available MPC decision is April's 8 to 1 vote to hold Bank Rate at 3.75%. One member preferred a rise. The Bank is balancing the inflation risk from energy costs against weaker demand. Fixed mortgage pricing need not follow the policy rate in a straight line.

BORROWING COST	PERIOD	LATEST
Bank Rate	9 June 2026	3.75%
Residential two year fix, 75% LTV	May 2026	4.91%
BTL two year fix, 75% LTV	May 2026	4.31%
BTL five year fix, 75% LTV	May 2026	4.80%
Effective rate on new mortgages	April 2026	4.08%

BoE monthly quoted benchmarks exclude fees. The effective rate describes lending actually drawn. These are different measures and are not a personalised mortgage offer.

CPI inflation against the 2% target

2.8% CPI inflation in April 2026, compared with 3.3% in the prior month.

5.0% UK unemployment in January to March 2026.

Next Bank Rate decision: **18 June**.

WORKED EXAMPLE / NOTIONAL PROPERTY

A £120,000 property let for £795 per calendar month has a gross yield of 7.95%. A 75% loan to value interest only mortgage is £90,000. This illustration uses the latest quoted BTL two year benchmark and a two point stress.

MONTHLY, BEFORE TAX	AT 4.31%	AT 6.31%
Scheduled rent	£795.00	£795.00
Management at 10% of scheduled rent	-£79.50	-£79.50
Void allowance, one month in twelve	-£66.25	-£66.25
Repairs and insurance at 10% of rent	-£79.50	-£79.50
Mortgage interest	-£323.25	-£473.25
Cash flow before tax and product fees	**£246.50**	**£96.50**

A two point rise costs £150 more per month (£1,800 a year). Purchase costs, tax and product fees are excluded.

07 / DISTRESSED ASSETS AND PROPERTY AUCTIONS

Separate financial pressure from saleable opportunity.

Mortgage arrears, repossessions and personal insolvencies measure different groups. They provide context for

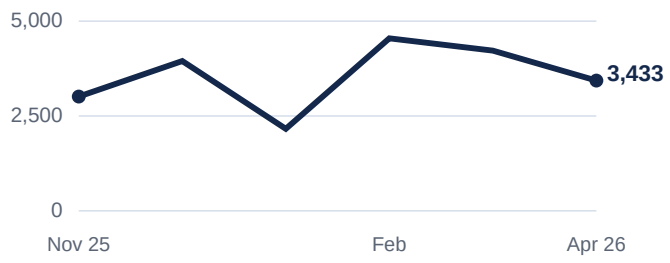

INDICATOR	SOURCE AND PERIOD	LATEST
Homeowner mortgages in arrears	UK Finance, Q1 2026	79,110
BTL mortgages in arrears	UK Finance, Q1 2026	8,960
Homeowner repossessions	UK Finance, Q1 2026	1,250
BTL repossessions	UK Finance, Q1 2026	810
Personal insolvencies	Insolvency Service, April 2026	10,920

UK Finance counts UK first charge mortgages with arrears of at least 2.5% of the balance. Personal insolvencies cover England and Wales and include more than bankruptcies.

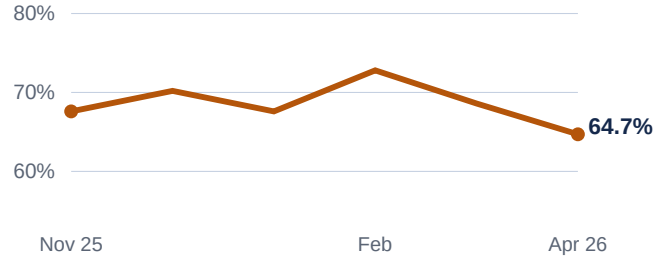

April registrations are 7% above a year ago and include 701 bankruptcies. Monthly totals have fallen from March. That movement alone does not establish a change in the direction of property distress.

08 / FARRELL'S VIEW

What I would do with these numbers

The asking price rise shows sellers still have confidence, while the activity data points to a more complicated market. I would resist treating the national average as a valuation for a particular lot.

Before you bid this month

The offer 1,211 UK lots went unsold in April 2026. Confirm availability and seller motivation. Work back from relevant completed sales, after all purchase and holding costs.

The finance The notional purchase leaves £246.50 a month before tax and fees at 4.31%, falling to £96.50 at 6.31%. Stress the valuation and the interest rate together.

The exit Confirm who can buy or refinance the property in its present condition. Allow time for legal work, remedial works and lender decisions. Keep a second workable exit and a cash reserve.
